

Visiting Hours at Concord Hospital

We welcome visitors at Concord Hospital. They improve a patient's recovery and the communication between patients, families and staff.

From Wednesday 1 June 2016 general ward areas will be open for visiting between 9am and 8pm.

These visiting hours have been designed around the needs of patients, their visitors and hospital staff to strike the right balance between patient-centred care and the provision of safe and high quality care.

They have been developed using feedback from our patients, their families and visitors about what is important to them.

These visiting hours do not affect the unique arrangements which will continue in the Burns Unit, Intensive Care Unit and Concord Centre for Palliative Care.

Please see our friendly staff if you require access outside of these hours
